SKILLS

• Swift • SwiftUI • Swift Concurrency • CI/CD • Test Driven Development

EXPERIENCE

Babbel GmbH – Berlin, Germany

iOS Engineer

02/2023 – Present

- Engineered native development using Swift/SwiftUI, optimizing core features for millions of global subscribers.
- Architected scalable UI flows using MVVM-C and TCA with RxSwift and Swift Concurrency for robust data syncing.
- Drove developer velocity and code quality through cross-functional mentorship, structured reviews, and automated CI/CD.

nSales A/S – Copenhagen, Denmark

Senior Software Engineer

01/2022 – 01/2023

- Architected multiple highly rated retail apps, utilizing modern MVVM and clean architecture layers.
- Engineered robust mobile ordering tools, interfacing Swift and Objective-C with RESTful APIs.
- Built offline-first capabilities by implementing and optimizing local SQLite databases.

Brain Station 23 Ltd. – Dhaka, Bangladesh

Lead Engineer

07/2017 – 12/2022

- Scaled legacy systems by modularizing monoliths into isolated frameworks, accelerating feature reusability.
- Elevated application reliability by establishing testing best practices and scaling unit and integration test coverage.
- Fostered team-wide quality standards by instituting robust testing strategies across multi-developer projects.

P1, Bashundhora Group– Dhaka, Bangladesh

iOS Developer

04/2016 – 07/2017

- Architected and delivered native iOS applications from zero to successful App Store deployment.
- Ensured high-performance UI responsiveness through strict adherence to Apple Human Interface Guidelines.
- Led agile delivery, aligning sprint goals with product managers to ensure predictable project velocity.

Advanced Apps Bangladesh Ltd. – Dhaka, Bangladesh

Software Engineer

04/2015 – 04/2016

- Simultaneously managed full-cycle development for concurrent client projects, consistently hitting critical milestone deadlines.
- Driven disciplined agile execution, optimizing sprint capacity to reliably deliver multiple parallel streams of work.
- Translated complex system engineering concepts into clear, actionable business value for non-technical leadership.

Grameen Solutions Ltd. – Dhaka, Bangladesh

Software Engineer

09/2013 – 01/2015

- Accelerated engineering velocity by providing cross-platform mobile expertise and dedicated support to distributed offshore teams.
- Scaled global development bandwidth through cross-functional technical alignment across remote, international time zones.

PROJECTS

Babbel - Babbel provides a structured, conversation-focused way to learn 14+ languages. It features 10-to-15-minute lessons, speech recognition, spaced repetition reviews, and an offline mode for learning on the go.

- Languages & Core Frameworks: Swift, SwiftUI, RxSwift, Swift Concurrency (Async/Await).
- Architecture: MVVM-C, Composable Architecture (TCA).
- Testing: Unit Test, UI Test, Snapshot Testing, UI Automation Test.
- CI/CD: GitHub Actions, Bitrise, Fastlane.
- Cloud & Infrastructure: AWS (API Gateway, Lambda), Firebase (Analytics & Remote Config), GraphQL / REST APIs.

nVision Mobile - nVision mobile is a sales automation solution. It gives user the power to quickly create an order without the messy order pad or spreadsheet. User can sell directly from the catalogue, browse categories and products or simply scan a barcode.

- Language: Objective C and Swift.
- Used MVVM, SQLite, REST API, ARKit, MapKit, APNs, Unit Test, Bitrise.

Sif Jakobs - Sif Jakobs is a retail app where user can quickly and easily find sophisticated jewellery of the highest standard with a modern expression.

- Language: Swift.
- Used SwiftUI, MVVM, Firebase, REST API, FCM, Unit Test, Bitrise.

Citytouch - Citytouch is the digital banking solution from The City Bank Limited for its valuable customers.

- Language: Objective C.
- Used MVVM, REST API, Biometric Auth, Unit Test, Fastlane.

Eleia - Eleia is a automated personal financial assistant and budget tracker app designed to help user to have a healthier relationship with their money.

- Language: Swift.
- Used SwiftUI, Combine, MVVM, Core Data, Firebase, In-App Purchase, Unit Test, Bitrise for CI/CD.

NPS - National Pro Staff is a Canada based application to connect with pro user and find out what baits and techniques work best on users favorite fishing spots.

- Language: Objective C.
- Used MVC, REST API, FCM, Unit Test.

Lind DNA Retail - Lind DNA is a retail app where user can find small furniture and tabletop products and order directly from the app.

- Language: Dart (Flutter cross platform app).
- Used MVVM, Firebase, REST API and Push Notification.

EDUCATION

Institute Of Business Administration, Jahangirnagar University

Master of Business Administration (MBA)

2015 - 2017

Mawlana Bhashani Science and Technology University

Bachelor of Engineering, Computer Science and Engineering

2009 - 2013
